

# Containerize the application

Team ID	PNT2022TMID13862
Project Name	Skill and Job Recommender Application
Team Members	Varun Krishnan V Nandhakumar M Suriyasankar P Sharath R Surendhar S

## 1. Container Registry

The screenshot displays the IBM Cloud Container Registry page. The header includes the IBM Cloud logo, a search bar, and navigation links for Catalog, Manage, and the user's account (shaju v's Account). The main content area is titled 'Container Registry' and includes a 'View all /' link. Below the title, there are buttons for 'Estimate costs' and 'Get started'. The page is divided into sections: 'Compliance' (EU Supported), 'Summary' (Manage Docker container images in a fully managed private registry), 'Features' (Highly available and scalable private registry, Image security compliance with Vulnerability Advisor, Quota limits for storage and pull traffic), and 'Pricing plans'.

## 2. Commands:

1. `ibmcloud plugin install container-registry`
2. `ibmcloud login -a https://cloud.ibm.com`
3. `ibmcloud cr region-set ap-south`
4. `ibmcloud cr namespace-add jobby`
5. `ibmcloud cr login`
6. `docker tag jobby au.icr.io/jobby/test`
7. `docker push au.icr.io/jobby/test`
